

Dust Masks, EKASTU

Comfortable Mandil dust masks from EKASTU/Sèkur (DIN EN 149:2001) offer protection against solid and liquid particles.

Filtering half-masks of the Mandil series are distinguished by low weight, modern styling, low respiration resistance, high user comfort (optionally with/without Cool Down exhalation valve). The Cool Down valve facilitates exhalation and prevents the build-up of heat under the mask.
