

Electronic Hanging Balances, KERN

Electronic hanging balances KERN HDB / CH / HCB / HCN

Practical and always handy - ideal for quick mobile balancing of hanging loads.

Model series KERN HDB: compact manual hanging balance with practical multi-data hold function, which helps with determining the balancing weight and enables easy reading.

Model series KERN CH: the practical solution for medium loads. With integrated, extractable measurement tape (100 cm), practical multi-data hold function, which helps with determining the balancing weight and enables easy reading, display of peak load (peak hold), stainless steel hooks, 1 × 9-volt block battery included

Model series KERN HCB: the compact, IP65-protected industrial hanging balance for bigger loads. Practical multi-data hold function, which helps with determining the balance weight and enables easy reading, peak load display (peak hold), integrated calibration system CAL. All models include stainless carabiner (opening ca. 15 mm), a stainless steel S-hook (opening ca. 25 mm) as well as 1.5 V batteries size AA.

Model series KERN HCN: the compact, IP65-protected industrial hanging balance for bigger loads. Practical multi-data hold function, which helps with determining the balancing value and enables easy reading, peak load display (peak hold), integrated calibration system CAL. All models include stainless carabiner (opening ca. 15 mm), a stainless steel S-hook (opening ca. 25 mm) as well as 1.5 V batteries size AA.

DKD calibration certificate optional available.

For applications that require verification, please order verification at the same time, initial verification at a later date is not possible. Verification at the factory, we need to know the full address of the location of use.
