

SICCO Mini-Desiccators for Gas Filling, Bohlender

- One Touch Door with circular seal
- Robust construction
- Transparent, shatterproof cabinet made of polycarbonate
- Superb all-round visibility
- Hinge door with wide opening angle
- Lightweight, transportable
- Stackable
- Desiccant in a handy, resealable container included in delivery
- Two connections for gas filling including quick couplings with self-sealing valves and hose

Gas filling SICCO Desiccators provide ideal conditions for the safe and secure storing of poisonous chemicals. Inert gas like nitrogen can be introduced as soon as the door is closed tightly. Compared to the ambient air the inert gas does not react with the stored substances.

① SICCO Mini-Desiccator for Gas Filling Basic

Including desiccant and hose with quick couplings for gas filling, stackable.

Technical data:

Panels:	clear
Material:	polycarbonate
Temperature resistance:	from -35°C to +70°C
Use:	normal pressure
Additional place requirement for coupling:	150 mm
Total all-over load:	3 kg
Length of tubing:	5000 mm

Outer dimensions W × H × D mm	Usable interior space W × H × D mm	Useful volume l	Weight kg	Order No.
221×183×214	212×162×180	6.2	0.9	10 17 61896

② SICCO Mini-Desiccator for Gas Filling Premium

Including desiccant, two shelves, hygrometer, non-slip rubber feet, quick couplings and hose for gas filling, stackable.

Technical data:

Panels:	clear
Material:	polycarbonate
Temperature resistance:	from -35°C to +70°C
Use:	normal pressure
Additional place requirement for coupling:	150 mm
Maximum all-over load per shelf:	3 kg
Length of tubing:	5000 mm

Outer dimensions W × H × D mm	Usable interior space W × H × D mm	Useful volume l	Weight kg	Order No.
221×183×214	212×162×180	6.2	0.9	10 17 61996
