

Peristaltic Pump, Landgraf

Peristaltic Pump LA-900

Peristaltic hose pump with a wide scope of functions for routine and research applications and for production. The pump may be operated independently or controlled via PC. All operation parameters, e.g. speed, dispensing quantities and pump directions, may be set via the keypad or the serial interface. Additionally, the pump may be controlled via TTL level.

The optional 4-roller head provides for precise dosing with low pulsation at a pump rate of up to 100 ml/min.

Technical data:

Flow rate: 0.5 ml/h to 900 ml/min
Rollers: 2
Power supply: 230 V/50 Hz
