

Filtrate Bottle for Filtration Systems, NALGENE®, IDL

Filtrate bottles, MF75™ series made of polystyrole, polyethylene cap.
Ergonomical design. For storing sterile solutions. Gamma-sterile and ready-to-use package for greater user comfort and significantly reduced risk of contamination. Can also be used as a practical single-use storage container. The screwed cap is leak-proof when closed with 1 1/2 turns, avoiding a change of the pH value in the filtrate bottle GLS 45. Non-cytotoxic, free of pyrogens. With certificate, sterile, graded, leak-proof.
