

Precision Balances BTD Series, Phoenix Instrument

With its modern design and the UNIBLOC weighing systems, the new BTD series sets new standards.

Other features of the BTD series:

- Calibration via push of a button with external calibration weight
- Separate stability indication
- Measuring time 2 seconds
- Large weighing space with draft shield comprised as a standard with mg balances
- Comfortable and easy operation via keys
- Very easy data transmission via Windows direct function
- Various application programs
- Backlit display
- On request, the balances can be supplied officially calibrated/approved
- 5 years warranty
