

Protection Overalls, neoLab®

Maximum barrier protection against hazardous liquids and particles.

Ideally suited for type 6 applications (spray-proof) and challenging type 5 applications (particle-proof), furthermore for types 3 and 4.

Complies with EN 1073-2: **Barrier against radio-active dust particles.**

Complies with EN 14126 and ASTM 1671: **Barrier against infectious materials and biohazards.**

- high strength, flexibility and stretchability
- seems fused with ultrasound
- made of resistant and durable material
- antistatic according to EN 1149.1
- ideal pattern for best fit

Tear strength: >1,000,000

Bursting strength: 56 kPa

Curving tear strength: 84N (MR), 53N (QR)

Puncture resistance: 10.5N

Chemical barrier: caustic soda 10%, penetration time >480 min

Particle barrier: particle penetration (only material)

Royo Channel 5 (3-3,5 µm): 0.00 %

Royo Channel 1 (1-1.5 µm): < 1 %

Passed spray test, splash test according to EN

Colour: white
