

Brushes, neoLab®

These brushes made of special frothed material (except for for test tubes and hoses) are significantly more durable than common brushes. The soft material does not scratch your glass ware, does not soak water and does not tire.

Brush for high glasses

Please only use in vessels filled with water. The brush adapts well to the form of the vessel and can be bent in any form.

Long brush with round head for glass cylinders etc.

This brush even cleans the highest cylinders!

Short brush with round head for cup glasses etc.

Soft care for your delicate glasses!

Short brush with bristles for test tubes etc.

The brush can be bent in any desired form, so that every curve can be cleaned thoroughly.

Brush for hoses

Brush with a wire handle for cleaning hoses. For hoses with diameters of ½", ¾" or 1".
