

Serological Pipettes, colour coded acc. to DIN, neoLab®

Serological disposable pipettes with colour-coded cotton

In accordance with the standard. **Sterile, seamless and monolithic pipettes** for higher accuracy (> 98%) and firmness. Pyrogen-free, not cytotoxic, not hemolytic.

- permanent graduation imprinted in black
- additional capacity due to negative graduation
- two opposite graduations at 5 to 25 ml
- short form, only 220 mm
- pipettes with big opening suitable for viscose media
- packed individually sterile or in sterile bags
