

Warm Stages for Microscopes, LAT

Microscopic chambers for investigating of samples at RT (room temperature) of max. 420°C (optionally, from -196°C to 600°C), 0.1°K resolution at the preparation, Koffler application, easy-to-use swing lid for loading and unloading the sample. User-friendly hinged lid for loading and unloading the sample. 26 × 76 mm specimen slides can be used. Fits under every standard microscope provided the objective used has a working distance of at least 6 mm. This is the case, for example, with practically all 10× objectives. Height of chamber 22 mm. Gas connections. XY manipulators. Other temperature ranges, also for inverted microscopes, available on request.
