

Waste Disposal/Safety Cans, KGW-Isotherm

Disposal cans specially designed for transporting and storing aggressive fluids. A "grounding set" can also be supplied for storage of flammable liquids.

The actual storage chamber consists of a glass globe made of 3.3 borosilicate glass with a screw-on lid which has a PTFE coated silicone seal. A metal jacket protects the glass globe. A large-diameter neck (Ø 90 mm) facilitates filling and emptying of the container. The containers are all fitted with a pressure relief valve.

Type	Volume l	Order No.
E 0	4	38 50 10004
E 1	8	38 50 10008
E 2	15	38 50 10015

Grounding set: Price on request.
