

BOLA Laboratory Screw Joints EX, Bohlender

Screw cap made of conductive black PPS-EX reinforced with glass fibres, inner parts made of conductive PTFE-EX.

Applications: Connecting equipment and fittings with GL threads with hard-walled tubing or tubes made of glass, plastic or metal. Fixing probes, thermometers, dip tubes or cables in reaction vessels.

Technical data:

Material:	PTFE-, PPS-EX
Temperature resistance:	from -200°C to +250°C
Chemical resistance:	++ very good
Pressure:	10 bar
Vacuum:	suitable
Conductivity:	10 ⁶ Ohm
