

Soil and Compost Thermometer, WINLAB®

Immersion thermometer in sturdy, user-friendly design, suitable for measuring the temperature in the soil, in compost, straw, and bulk goods.

The waterproof immersion sensor has a stable handle with a non-slip rubber surface for powerful plunging into the soil or compost.

Complete with indicator for thermocouple type K (NiCr-Ni).

Technical data:

Measuring range:	depending on application -100 to 800°C for soil and compost von 0 to 120°C
Accuracy:	±1°C in the range of -20 to +180°C
Diameter of probe:	8 mm

Article	Order No.
Soil and compost thermometer, probe length 500 mm	10 03 00500
Soil and compost thermometer, probe length 1000 mm	10 03 01000
Soil and compost thermometer, probe length 1500 mm	10 03 01500
