

Sludge Trap / Sedimentation Tank, Labor-Pilz

WW2VA002

Polypropylene sludge trap/sedimentation tank for retention of heavy suspended particles in waste water.

Ideal for waste water pre-treatment by gravitation for application in building material test labs, ceramics labs, metallurgical labs, and other test laboratories producing waste water with a high sediment load which requires pre-treatment before it can be fed into the municipal sewage system.

- Lid with sealing gasket and clip closure
- Inner basket with two-chamber system (removable)
- With wheels

Technical data:

4711-SF4020

Outer diameter with lid:	335 mm	420 mm
Height tank:	300 mm	400 mm
Height including wheels and lid:	400 mm	500 mm
Volume inner tank:	14 l	18 l
Volume outer tank:	21 l	25 l
Connections:	G 1 1/2"	G 1 1/2"
Colour:	Tank RAL 7032, lid RAL 7011	

Article	Order No.
