

Ion-exchange System DS 450, LAT

Unpressurized synthetic cartridge made of blue polyethylene, filled with mixed-bed resins. For treatment of small amounts of water in medical practices, small labs, or for production of battery water.

An analog conductivity meter, a wall bracket, and 2 × 1.5 m tubing are comprised in the delivery.

- Pure water quality 0.1 – 20 µS/cm
- Tubing connection R3/4" AG
