The compact jerrycan 5 and 10 litres

For more content on less shelf width

With a width of only 6.5 cm or 12.5 cm, this space-saving canister is ideal for storing and filling a wide variety of liquids in a small space. The compact jerrycan can also be stored horizontally, e.g. in refrigerators.

Available with or without threaded spout or as a practical space-saving set with matching drain cock

– for perfect storage and filling when space is at a premium!

- With or without threaded connector 3/4"
- PP, transparent
- With tamper-proof closure
- With moulded, indestructible litre graduation

Shaker KM CO₂ made of stainless steel

The shaker **KM CO₂** made of stainless steel with orbital shaking motion was especially designed for use in incubators with up to 20 % CO₂ concentration and up to 95 % humidity. This guarantees the optimum development of your cell cultures.

Basic Equipment

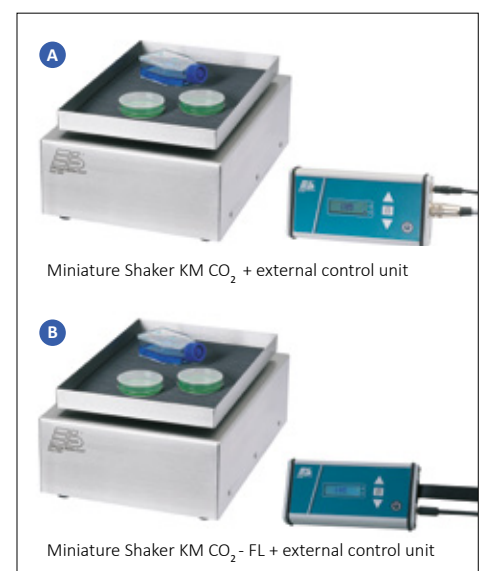

- Basic device incl. basic platform with rubber mat and external control unit

Technical Data

Motion	orbital
Shaking platform	200 x 295 mm
Max. load	2 kg
Shaking speed	5 – 220 rpm, in steps of 5
Stroke	20 mm
Electrical supply	100 – 240 V, 50 / 60 Hz
Enclosure protection	IP 21
CO ₂ concentration	20 %
Heat emission	approx. 0.5 – 1.5 W
Ambient temperature	4 °C to 45 °C
Relative humidity	~ 95 % (non-condensing)
Dimensions (w x d x h)	230 x 340 x 145 mm
Weight	7.6 kg

CRVpro ROTARY VANE PUMP PACKAGE

CRVpro pump package solution – All in one kit

Discover the latest generation of two-stage rotary vane pumps. These powerful pumps features highest reliability and a long service life.

Modern and compact design enables use for a wide range of laboratory applications and process applications - freeze dryers, vacuum concentrators, Schlenk lines, glove boxes, etc.

CRVpro **Rotary Vane Pump PREMIUM package** consisting of:

- Two-stage rotary vane vacuum pump CRVpro
- Multi-range Vacuum gauge VMpro 2 Chem
- Oil mist filter AKD 16
- Vacuum valve VAV 16
- Vacuum connection components

Excellence in Evaporation Hei-VAP Expert Control ML G3B XL

Precise setting of rotation speed, heating bath temperature, vacuum, and chiller temperature on the digital 5" touch display or – for quick access during an active process – directly via the knobs on the operating panel.

- G3B XL coated, implosion protected glassware with 2.200 cm² cooling surface for up to 40 % higher evaporation rates
- Extendable solvent library and ramping function
- Automatic evaporation (boiling point detection) with optional AUTOaccurate-Sensor

- Motorized lift for convenient adjustment of the immersion depth and automatic lift-up function in the event of a fault and at the end of the process
- LED ring lights
- USB / Micro SD interfaces
- Made in Germany
- 3 years warranty

ISOLAB volumetric flask With special coating – class “A”

- Optimal for dangerous and/or valuable solutions
- Coating reduces impact and minimizes potential risks in case of breakage
- Broken parts are kept undamaged
- Coating keeps solutions in the flask – no leakage

- Highly transparent coating
- resists up to 135 °C at max. 30 min
- Dishwasher safe and autoclavable

Memmert constant climate chambers HPPeco

Maximum energy efficiency in continuous operation.
This powerful climate chamber with Advanced Peltier Technology works around 90 % more energy efficiently than compressor-cooled devices, does not require any refrigerant and is therefore nearly maintenance-free. The temperature control from +0 °C to +70 °C as well as the active humidification and dehumidification from 10 % to 90 % rh are optimally tailored to the requirements of stability tests, durability tests as well as quality tests.

The high-precision control guarantees a homogeneous and stable distribution of temperature and humidity across various parameters. With the new micro-dosing pump and smart control, the interior is delicately and quickly humidified.

LIEBHERR

Welcome to SmartMonitoring from Liebherr

**Eases the burden in what is often overburdened:
Your daily work.**

In medicine and research, precision and safety are of the utmost priority. This also applies to storing sensitive substances. Medicines, vaccines, tissues or samples, which need refrigeration require constant and precise temperatures, non-stop monitoring and supporting documentation. The strict specifications of DIN standards on the storage of medicines place a high demand on staff in terms of time and effort.

SmartMonitoring from Liebherr solves problems before they happen. So you can keep a clear head for work.

SmartMonitoring can help ease some of that burden.

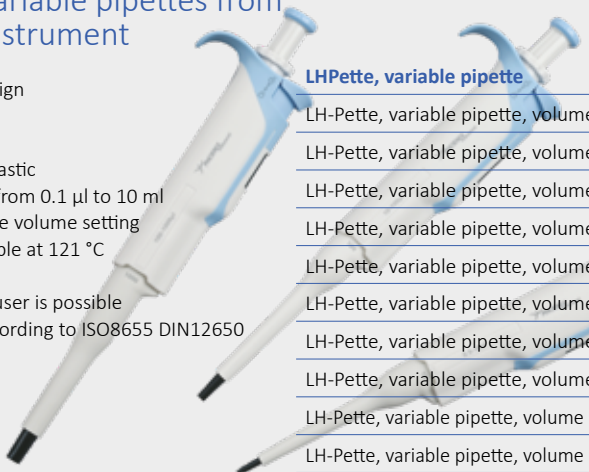

The cloud-based digital solution ensures maximum protection for sensitive substances:

- **Precise monitoring** of temperature stability, available in multiple locations across several appliances
- **Seamless documentation** around the clock with no additional demands on time
- **All relevant data, at a glance, at any time**
- Immediate **alerts to deviations** via e-mail, text message or phone call

LH-Pette
the new variable pipettes from
Phoenix Instrument

- ergonomic design
- low weight
- low effort
- UV-resistant plastic
- volume range from 0.1 µl to 10 ml
- simple, lockable volume setting
- fully autoclavable at 121 °C
- colour codable
- calibration by user is possible
- conformity according to ISO8655 DIN12650

**Erlenmeyer flasks,
GL 45, PP**
Highly transparent

Well suited for storage and cultivation of cell cultures. Far safer than glass flasks for use in incubator shakers due to the break resistance of plastic. Suitable for microwaves. To preserve markings, cleaning at no higher than 60 °C is recommended.

Suitable for contact with foodstuffs according to regulation (EU) No. 10/2011.

LIEBHERR**Laboratory Refrigerators with Comfort Electronics**

All units have a self-closing door with integrated lock, integrated data memory with min./max. temperatures, floating contact, RS485 interface, feedthrough for external temperature sensor and a safety temperature limiter (in fridges, prevents temperatures below +2 °C in case of failure), acoustic and optical temperature and door opening alarms. The program portfolio comprises 2 free-standing and 2 under-worktop laboratory fridges, each with insulation and glass door, temperature range adjustable from +3 to +16 °C. The dynamic cooling system ensures high temperature constancy and an even temperature distribution.

LabHEAT® standard heating mantles series KM-G

ISOHEAT®

In chemical and biotechnical laboratories these heating mantles belong to the standard equipment because many reactions in this areas are temperature dependent. All heating mantles and also accessories such as tripod, support ring or regulators are on stock. Special versions for other specifications, voltages or power and for temperatures up to 900 °C available on request.

- For operating temperatures up to 450 °C
- Flexible glass yarn heating element
- An even heat transfer and a gentle treatment of the glass flask
- High quality design, traditionell made by hand work
- Thermally insulated and earthed
- Sizes from 500 ml with Ø 60 mm bottom hole
- Standard with four mounting hooks
- With heating-zone switch and residual current detection (RCD)

CORIO 310F

Compact, powerful and environmentally friendly Refrigerated / heating circulators of the CORIO series

The **CORIO 310F**, **450F** and **449F** chillers use natural, environmentally friendly refrigerant and have also been developed with a focus on energy efficiency. This leads to significant operating cost savings in many application scenarios and thus to a faster pay-

back of the initial costs. At the same time, the lower energy consumption makes a positive contribution to climate protection.

Do more with OHAUS

Professional Balances and Lab Equipment

- ✓ premium quality
- ✓ on stock, fast delivery
- ✓ unbeatable price/performance

Cost-effective Hot Plate Stirrers:
high security and stirring performance,
fast heating

Mini Centrifuge:
powerful, simple, secure.
Accessories increase flexibility

Vortex Mixer:
robust, flexible, several
models for perfect mixing

Mini Centrifuge	Speed rpm	Accessories	Security	Dimension cm	Qty	PU	Special Price/PU
